EXPERIENCE

Software Developer

03/15 – Present

Sideways8 Interactive, LLC

- Developed a variety of custom plugins including image uploaders, site builders and 3rd party integrations.
- Built custom RESTful APIs, including one that integrates with an existing Ember.js application that displays location and availability of job openings.
- Contributed to the company's custom framework that implements a more OO and modular approach to WordPress development.
- Updated development processes for better utilization of Git and Agile development, as well as implemented PSR standards and proper coding practices.

Software Developer & Consultant

03/14 – 03/15

Atcore Systems, LLC

- Used Starfish ETL to migrate millions of records from various legacy CRMs to SugarCRM.
- Built custom integrations and RESTful APIs to communicate with 3rd party software.
- Consulted customers on data migration, module creation and software enhancements to streamline their marketing and sales processes through the use of SugarCRM.

Technical Solutions Representative

08/10 – 03/14

Carestream Dental

- Fixed errors in flagship software through writing dynamic and reusable SQL queries, product and Windows Server knowledge
- Performed 100+ server migrations and resolved 100+ data integrity and data corruption errors.
